

1

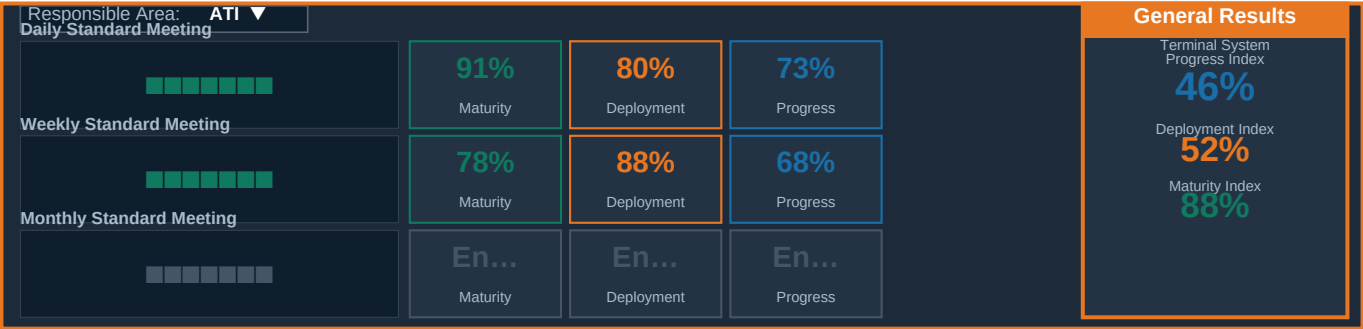

SHEET 1 — System Overview (all terminals)

- A
- Terminal System Progress Index: Top-left boxes. Headline monthly average — first number to check every month.
- B
- Deployment Index: % of target meetings running. Low = rollout incomplete, expand coverage first.
- C
- Maturity Index: Quality score of meetings already running. Low = coaching and execution needed.
- D
- System Progress by Terminal: Each bar = one terminal's monthly avg. Tallest = benchmark. Shortest = needs action.
- E
- Deployment by Terminal: Short bar = many meetings not yet deployed there.
- F
- Maturity by Terminal | G Time line Evolution: Short bar = low quality meetings. Chart (bottom-left): 4 lines trending up = system improving.

2

SHEET 2 — Terminal Detail (use Responsible Area filter to select terminal)

- ▼
- Responsible Area filter: Select a specific terminal (ATI, ITI, SPC...) or "Todas" for all combined.
- A
- Meeting cadence rows: Daily / Weekly / Monthly: Each row = one cadence. Chart shows trend by business unit — each colored line = one team. Rising = improving.
- B
- Maturity · Deployment · Progress per cadence: Monthly averages. Cadence with lowest Progress = priority. "En progreso" = not enough data yet, check at month-end.
- C
- General Results panel (right): Terminal totals — System Progress Index, Deployment Index, Maturity Index. Use these numbers in management reviews.
